#### Introduction

At the end of each calendar year Financial Services of County Administration – Operations, aggregates and analyzes information regarding the previous twelve month's investment activity. This Annual Investment Report for the calendar year ended December 31, 2016 captures that information and is used by the Investment Advisory Committee to form a conclusion about whether or not management has met the legal and administrative parameters set forth in the Oregon Revised Statutes, Lane Manual, and Lane County's Administrative Procedures Manual.

#### **Portfolio Examination**

This Annual Investment Report is organized to examine the general investing objectives of the portfolio. In priority order they are:

#### General Investing Objectives

- **Safety** Seek to ensure preservation of principal in the overall portfolio by mitigating credit risk and interest rate risk.
  - o Credit Risk Risk of loss due to failure of the security issuer or backer.
  - Interest Rate Risk Risk that the market value of securities in the portfolio will fall due to changes in market interest rates.
- Liquidity Seek to ensure portfolio remains sufficiently liquid to meet daily operating requirements.
- Yield Seek to attain a rate of return that is typical of market conditions for similar portfolios with comparable safety and liquidity needs.

Although ranked, these objectives represent factors that interrelate and should be considered together when managing the investment portfolio. No objective supersedes another but all three objectives should receive adequate consideration, as prioritized, before making investment decisions.

#### **Investment Reports**

Investment reports at the end of this Annual Investment Report provide details of the investment portfolio and reconciliations between Sympro (the investment software program) and the County's general ledger. Such information was used to develop the portfolio examination and determine the County's compliance with its legal and administrative parameters.

### **Executive Summary**

#### **Compliance**

Lane County's investment portfolio complied with Oregon Revised Statutes, the Lane Manual, and Lane County's Administrative Procedures Manual (APM).

#### Safety

*Credit Risk* – Lane County's investment portfolio has not been subjected to unreasonable risk of loss.

- All securities held are either backed by the US Government or meet minimum ratings set by either Standard and Poor's or Moody's Investor Service.
- No one financial institution (excluding LGIP) accounts for more than 26% of the County's investment purchases.
- Investments are well diversified with no one investment vehicle (excluding LGIP) accounting for more than 16% of the portfolio.

Interest Rate Risk – Lane County's investment portfolio has minimized the risk that the market value of securities will fluctuate when market interest rates change.

• The portfolio has limited the term of all securities to three years or less, and the portfolio complies with the minimum investment percent per maturity term as established in the APM.

#### Liquidity

The investment portfolio is sufficiently liquid to meet all operating requirements. No securities were required to be sold prior to maturity to meet cash flow needs.

#### Yield

The County investment yields have remained relatively stable the last year but have continued to increase as a result of the Fed move in increase interest rates. The County's December 31, 2016 yield was 1.122%, up from .866% last year and the highest it's been since September 2012. The State of Oregon's LGIP rate also improved from .60% in December 2015 to 1.03% in December 2016. The current LGIP rate is 1.15%. The County yields continue to be above both LGIP and Eugene.

#### **Long-term Rates Analysis**

The spread in yields between the 1, 2, and 3 year treasuries have improved and are projected to do so. However, longer-term rates continue to lag behind historical averages.

# **Investment Authority**

#### State Authority

Oregon Revised Statutes 294 and 295 governs the investment of public funds for Oregon municipalities.

https://www.oregonlegislature.gov/bills\_laws/ors/ors294.html https://www.oregonlegislature.gov/bills\_laws/ors/ors295.html

#### Local Authority

Lane Manual 4.015 to 4.020 states the policies to be followed by the Director of Management Services in administering the investment program.

<a href="http://www.lanecounty.org/government/county\_departments/county\_counsel/lane\_manual/">http://www.lanecounty.org/government/county\_departments/county\_counsel/lane\_manual/</a>

#### **Procedures**

Administrative Procedures chapter 2, section 20, provides specific direction to the Director of Management of Services in administering the investment program. <a href="http://insidelane.lc100.net/Documents/portal\_001/module\_0188/Chapter2Section20Issue7.pdf">http://insidelane.lc100.net/Documents/portal\_001/module\_0188/Chapter2Section20Issue7.pdf</a>

### **Portfolio Summary**

#### Summary Activity for the Calendar Year Ended December 31, 2016

Par Value*			Par Value*	Book	Fair	Investment
1/1/2016	Purchases	Redemptions	12/31/2016	Value**	Value ***	Earnings ****
\$230,342,873	\$1,004,609,386	(\$974,208,052)	\$260,744,207	\$261,056,363	\$260,301,427	\$2,434,526

- \* Par Value represents the face value of securities
- \*\* Book Value represents Par Value plus or minus premiums, discounts, and prepaid interest
- Fair Value represents the estimated value of the portfolio if sold in its entirety on December 31, 2016
- \*\*\*\* Investment Earnings are reported on the accrual basis of accounting

### **Portfolio Examination**

#### **Safety Considerations**

Safety of principal is the foremost objective of the investment program. Investments shall be undertaken in a manner that seeks to ensure the preservation of principal in the overall portfolio. The objective is to mitigate credit risk and interest rate risk.

#### Credit Risk

Lane County mitigates credit risk by performing the following:

- 1. Security analysis
- 2. Financial partners analysis
- 3. Diversification analysis

#### Security Analysis

#### Types of securities

Oregon Revised Statutes and the APM limit the types of investments that the County can hold. During the calendar year ended December 31, 2016 the County held the following types of securities:

- US Treasury and Agency bonds
- State of Oregon and Washington bonds
- Oregon, California, and Washington Municipal bonds
- Corporate bonds

#### Investment ratings

Oregon Revised Statutes and the APM require minimum ratings from either of the following rating agencies for each of the following security types:

<u>Type</u>	<u>S&amp;P</u>	Moody's
<ul> <li>Oregon state and Oregon municipalities</li> </ul>	Α	Α
<ul> <li>Washington state, California and</li> </ul>		
Washington municipalities	AA	Aa
<ul> <li>Corporate indebtedness:</li> </ul>		
<ul> <li>Promissory notes</li> </ul>		
Non-Oregon	AA	Aa
Oregon	Α	Α
<ul> <li>Commercial paper</li> </ul>		
Non-Oregon	P-1	A-1
Oregon	P-2	A-2

#### Financial Partners Analysis

The APM requires the County to pre-qualify the use of any depository, financial institution, or broker/dealer.

#### **Depositories**

US Bank is the County's main banking partner. The contract expired December 31, 2015 but has been extended through January 31, 2017. The County is expected to contract with US Bank for a new multi-year agreement through a competitive pricing cooperative procurement process from the City of Salem. Other banks and credit unions used by the County include:

- Umpqua Bank (Money Market account)
- Banner Bank (Public Works site in Florence)
- Oregon Community Credit Union (CDs and Money Market Account)
- Northwest Community Credit Union (CDs and Money Market account)

#### Other Financial Institutions

US Bank is the County's third-party custodian of all County securities.

#### Broker/Dealers

Lane County works through various broker/dealers when purchasing securities. In June of each year, broker/dealers are reviewed for qualifications by Financial Services, and if acceptable, no fewer than four and no more than six are submitted to the County Treasurer for approval. The following is a list of broker/dealers and non-broker/dealers used by the County and their percent of the December 31, 2016 portfolio:

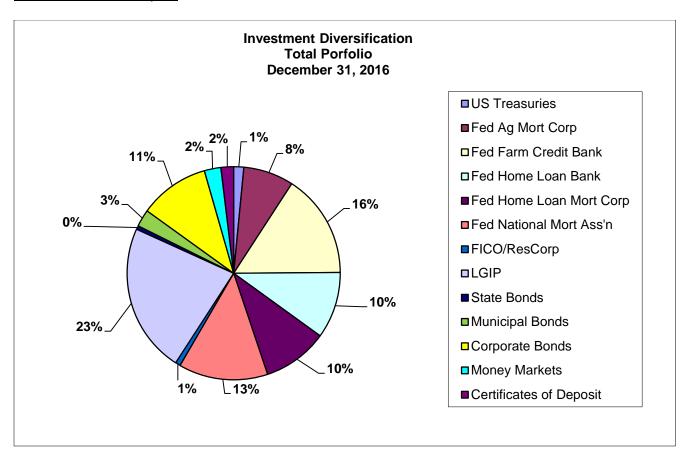

<b>Broker</b>	s/Dea	lers:
---------------	-------	-------

Vining Sparks	25.5%
Oppenheimer & Co.	20.9%
Piper Jaffray	12.3%
Mutual Securities	9.3%
Wells Fargo	4.2%
D.A. Davidson	0.8%

#### Non-Broker/Dealers:

State of Oregon (LGIP)	22.6%
Oregon Community Credit Union	1.9%
Northwest Community Credit Union	1.5%
US Bank	0.9%
Umpqua Bank	0.1%

#### **Diversification Analysis**

During the calendar year ended December 31, 2016 the County held the following types of securities:

The APM states that investments are not allowed to exceed the following as a percent of all monies available for investment:

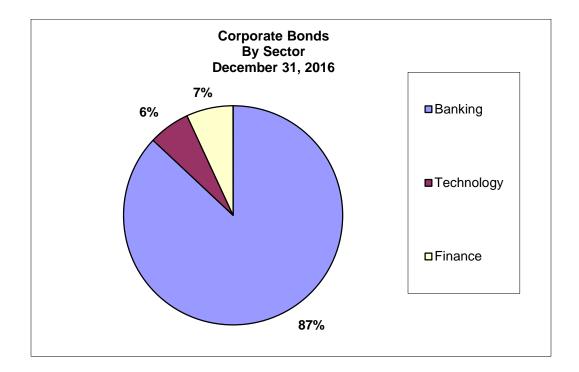

- 33% United States or any one of its agencies
- 25% Bankers Acceptances
- 35% Corporate Indebtedness, or 5% in any one single corporate issuer

The County investments are adequately diversified.

#### Sector Reporting

Sector reporting identifies the economic subdivisions of a portfolio. Lane County's sectors by Governmental Bonds and Corporate Bonds follow:

Agriculture, residential housing, and banking are the largest clusters of the Lane County portfolio. Market shifts in those sectors can greatly impact the value of County investments.

#### Interest Rate Risk

Interest rate risk is addressed as follows:

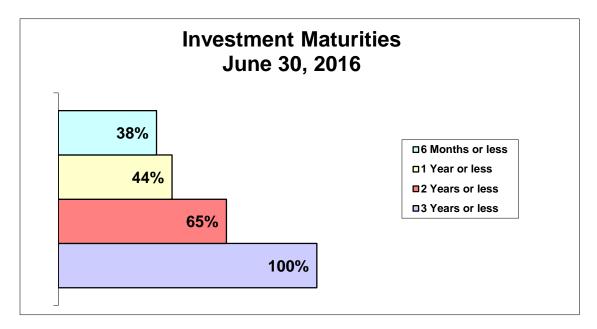

#### Portfolio Structure

Lane County structures the maturities of its investments so that securities mature to meet cash flow requirements for ongoing operations. During the calendar year ended December 31, 2016, no securities were required to be sold prior to maturity to meet cash flow requirements. Please see the discussion on Liquidity for more information.

#### Maturity Analysis

The APM requires that the County not invest in securities whose maturity is more than three years from the date of purchase unless matched to a specific cash flow and approved by the Board of Commissioners. At this time, no County investments exceed three years, nor has the Board of Commissioners granted specific authorization for any investment to exceed three years.

The maturities of the County investment portfolio at fair value, without consideration of calls, are as follows as of December 31, 2016:

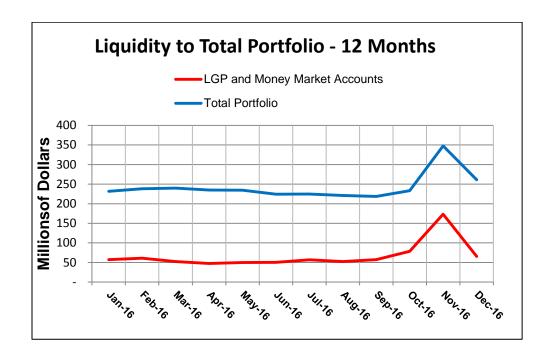

The APM requires the following minimum investment percent per maturity term:

- 20% of the portfolio must mature within 6 months
- 30% of the portfolio must mature within 1 year
- 50% of the portfolio must mature within 2 years
- 100% of the portfolio must mature within 3 years

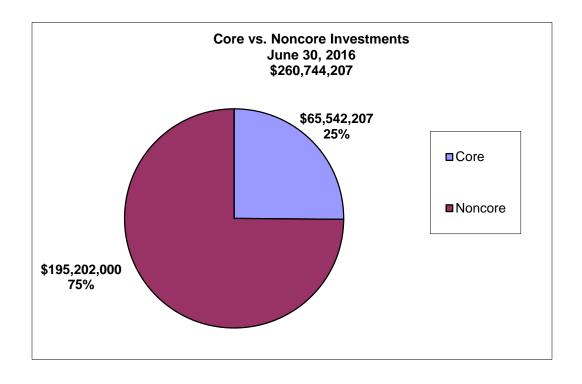

The investment portfolio is in compliance with this requirement as of December 31, 2016.

#### **Liquidity Considerations**

The investment portfolio needs to remain sufficiently liquid to meet the daily operating requirements that may be reasonably anticipated. This is accomplished by structuring the portfolio so that securities mature concurrent with cash needs to meet anticipated demands. Lane County expends approximately \$28.6 million per month. In order to keep cash in our checking account low and still pay our bills on time, the County invests with the LGIP and commercial money market accounts that offer same day liquidity. Over the past twelve months, the combined LGIP and money market account balances (exempting November) averaged \$57.3 million (approximately two months of operating cash). The spike in November is the result of the temporary investment of property tax receipts with the LGIP. Most receipts are reinvested into securities within one month.

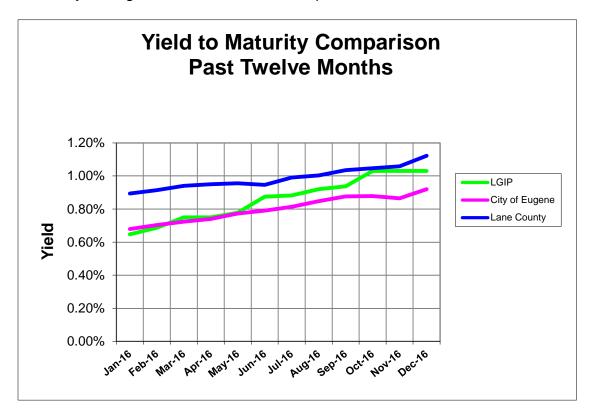

The following graph distinguishes between core and noncore investments in the portfolio. Core investments consist of money market funds and money with the LGIP. They are the solid foundation to our portfolio's safety and liquidity goals. They carry little interest rate risk and offer next day liquidity. The noncore investments consist of certificates of deposit and government and corporate bonds with longer term maturities. The noncore portfolio has the potential to increase returns, but they also increase the portfolio's volatility.

#### **Yield Considerations**

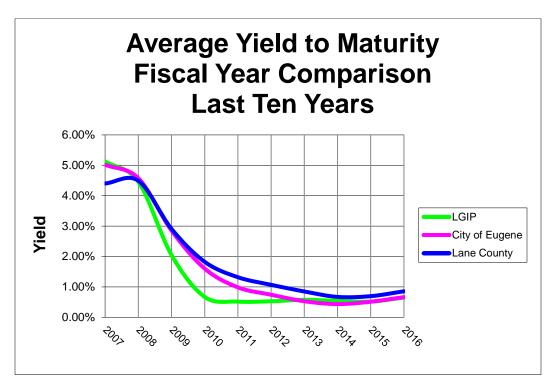

The investment portfolio is designed with the objective of attaining a rate of return throughout budgetary and economic cycles that is typical of market conditions for similar portfolios, taking into account the investment risk constraints and liquidity needs of the County. However, return on investment is of secondary importance compared to the safety and liquidity objectives previously discussed. Lane County benchmarks its actual investment yield for the portfolio overall to the State's LGIP and the City of Eugene's internal investment pool.

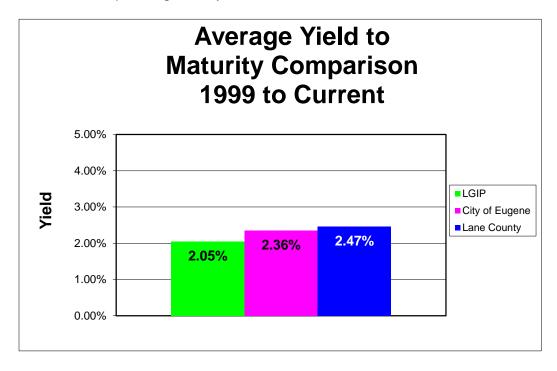

Typically, the County outperforms Eugene and LGIP when rates are on the decline, but underperforms them when rates are on the rise. This is because the County's investment policy has historically allows the investment in securities for longer durations than does Eugene or LGIP. Specifically, when interest rates decline, the County's portfolio does better because it holds higher yielding investments longer. Conversely, when interest rates rise, it takes longer to liquidate the lower yielding investments and invest in more productive securities. The aberration in November is the result of temporary investment of property tax receipts with the LGIP prior to reinvesting in higher yielding securities.

As of December 31, 2016, the County's average yield to maturity was 9.2 basis points higher than the LGIP and 20.2 basis points above Eugene's.

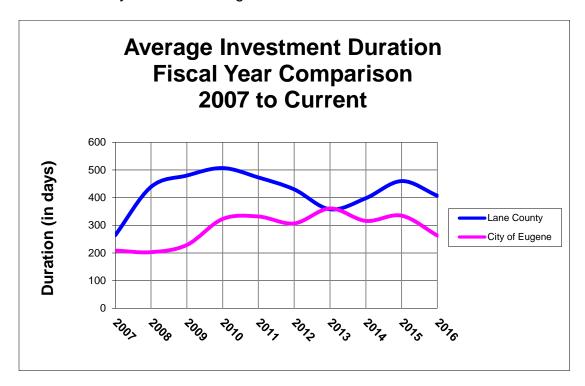

As evidenced in the following graph, when yields decline the County outperforms Eugene and LGIP, but when yields rise, the County lags behind. It should be noted Lane County's policy of investing longer term helps smooth earnings over multiple years, providing more resource stability than those portfolios with shorter-term investment strategies.

The next graph shows the County's average yield performance outpacing Eugene and LGIP over the past eighteen years.

Duration is a concept that measures the number of years it will take to recover the purchase price of a bond. Applied to the entire portfolio, average duration helps us gauge our level of interest rate risk. Duration often fluctuates based on market conditions as the yield curve changes.

For example, between 2005 and 2007, Lane County reduced its portfolio of two and three year maturities because short-term investments were yielding more than long-term investments (inverse yield curve). In 2008 Lane County started buying long-term again in response to the increase in the yield spread.

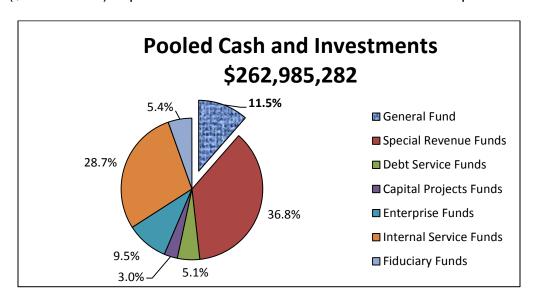

In 2010 yields began to decline again at such a rate that there was a multitude of calls on the longer-term investments. In order to stave off purchasing long-term at low market rates, the County increased money market holdings, waiting for the market to rally before purchasing long-term again. In 2013 the market began to rebound so the County began to purchase long-term again. However, 2016 saw rates increase nicely, but short-term investments in the LGIP did even better. In some cases, three year agencies were only paying a little better than the LGIP. As a result, the County kept balances high at the LGIP, thus lowering the average portfolio duration. As of December 31, 2016, the County's average investment duration was 389 days to maturity.

Please note in 2010 Eugene changed their investment policy to allow them to invest in longer term maturities. The result is a steady increase in their duration over time.

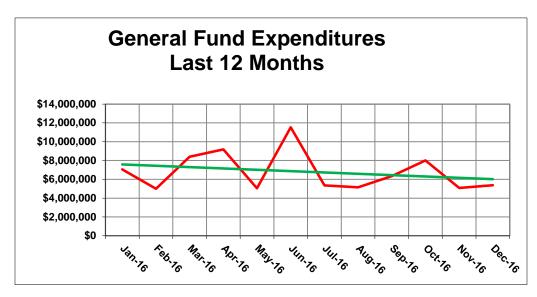

### **General Fund Analysis**

The County's investments are pooled together with operating bank accounts to be utilized by all funds.

The following graph is a representation of the ownership of the cash and investment pool by fund type as of December 31, 2016. As can be seen, the General Fund owns 11.5% (\$30.1 million) of pooled cash and investments at the end of the period.

General Fund expenditures over the last twelve months are as follows:

The red line above reports actual cash-basis expenditures by month. The green line is a linear trend of average monthly expenditures (\$6.2 million per month). The General Fund balance in pooled cash and investments represents between two to three months of operating liquidity. The spike in June is the result of budgeted end-of-year transfers.

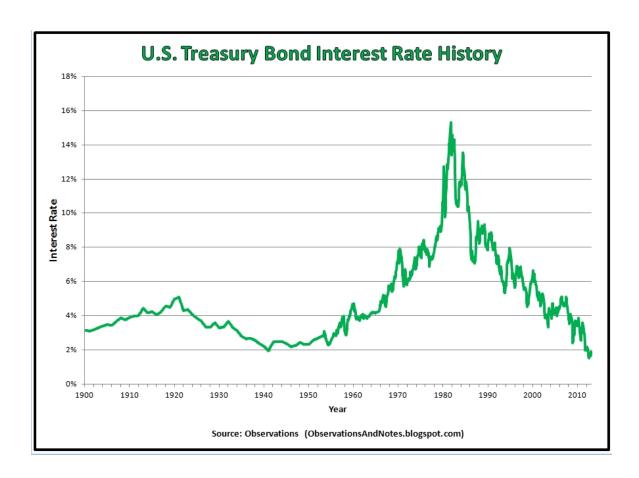

## **Long-Term Rate Analysis**

The APM allows the County to invest in securities whose maturity is more than three years when matched to a specific cash flow and approved by the Board of Commissioners.

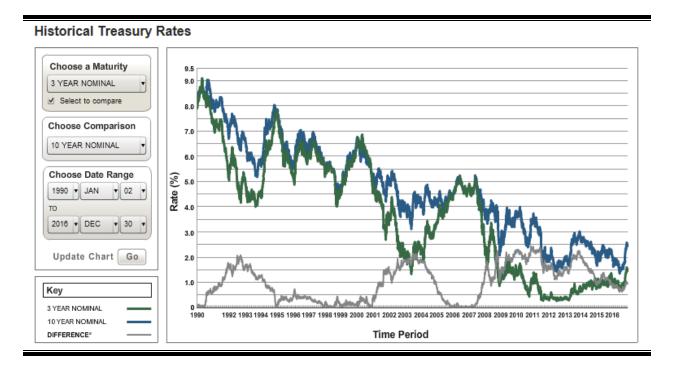

New issue rates for US Treasuries are considered indicative of the market for longer-term investments. On February 1, 2017, new Treasury issues were as follows:

1 - Year	.83%
2 - Year	1.22%
3 - Year	1.49%
5 - Year	1.93%
10 - Year	2.48%
30 - Year	3.08%

The spread between a 3 and 5 year Treasury is 44 basis points and between a 3 and 10 year Treasury is 99 basis points. The following is a graphical presentation of the 10 year Treasury note since the 1900's. As can be seen, we are at historic lows.

The following graph compares 3 year treasuries with 10 year treasuries from 1990 to current. The <u>blue line is the 10 year</u> and the <u>green line is the 3 year</u>. The gray line is the difference. The best time for the County to invest beyond three years is when interest rates are high and the spread between the three year and ten year is large.

Trend analysis on 10-year Treasuries reports an average yield of 4.951% over the last 15 years and 3.731% over the last ten years. The fifteen year high was 9.09% and the ten year high was 6.19%. Unfortunately, the spread between 3 year and 10 year treasuries is poor right now (97 basis points), and the 10 year is trading 133 basis points below the ten year historical average.

### **Custodial Banking Fees**

Effective the beginning of 2013, Lane County selected US Bank as it third-party safe-keeper for all of its securities. Prior to that date, Union Bank had been the County's third-party safe-keeper for nearly fifteen years. Contracted fees over the past five calendar years are as follows:

2016	\$4,800	US Bank
2015	\$4,800	US Bank
2014	\$4,800	US Bank
2013	\$4,800	US Bank
2012	\$9,253	Union Bank

US Bank receives securities the County purchases and relinquishes securities the County sells. All of the securities are held in Lane County's name. Fees to US Bank are based on a flat fee contract of \$4,800 annually, regardless of the level of activity.

Fees to Union Bank were based on activity of securities bought and sold, which is reflected in the fluctuation of their fees. A large fee increase in 2012 is what prompted us to seek a new third party safe-keeper.

### **Federal Government Bond Descriptions**

The following is a brief narrative of federal government bonds.

<u>United States Treasury Securities</u> are government debt instruments issued by the United States Department of the Treasury to finance the national debt of the United States. There are four main types of marketable treasury securities: Treasury bills, Treasury notes, Treasury bonds, and Treasury Inflation Protected Securities (TIPS). The marketable Treasury securities are very liquid and are heavily traded on the secondary market. They are also referred to as US Direct debt.

The Federal Agricultural Mortgage Corporation (FAMC) also known as Farmer Mac is a stockholder-owned, publicly traded company that was chartered by the United States federal government in 1988 to serve as a secondary market in agricultural loans such as mortgages for agricultural real estate and rural housing. Farmer Mac is a government-sponsored enterprise or GSE (also called an "Agency") that provides liquidity to the market by purchasing loans from agricultural lenders and selling instruments backed by those loans.

<u>The Federal Farm Credit Bank</u> Funding Corporation (FFCB) is an integral part of the Farm Credit System, a leading provider of loans, leases and services to U.S. agriculture and rural America. The Farm Credit System is a government-sponsored enterprise created in 1916 and is responsible for issuing and marketing debt securities to finance agriculture loans, leases and operations.

<u>The Federal Home Loan Banks</u> (FHLB) are 12 U.S. government-sponsored banks that provide stable, on-demand, low-cost funding to American financial institutions (not individuals) for home mortgage loans, small business, rural, agricultural, and economic development lending. Chartered in 1932, the Banks are cooperatives owned by their members who are more than 7,500 community financial institutions of all sizes and many types in every U.S. state and territory.

The Federal Home Loan Mortgage Corporation (FHLMC) also known as *Freddie Mac* is a government-sponsored enterprise created in 1970 to expand the secondary market for mortgages in the US. Freddie Mac buys mortgages on the secondary market, pools them, and sells them as a mortgage-backed security to investors on the open market. This secondary mortgage market increases the supply of money available for mortgage lending and increases the money available for new home purchases.

The Federal National Mortgage Association (FNMA) also known as Fannie Mae was founded in 1938 during the Great Depression as part of the New Deal. It is a government-sponsored enterprise whose purpose is to expand the secondary mortgage market by securitizing mortgages in the form of mortgage-backed securities, thus allowing lenders to reinvest their assets into more lending and in effect increasing the number of lenders in the mortgage market.

<u>The Financing Corporation</u> (FICO) is a mixed-ownership United States government-sponsored enterprise that assumed all the assets and liabilities of the insolvent Federal Savings and Loan Insurance Corporation (FSLIC) and operates as a financing vehicle for the FSLIC Resolution Fund after the former was abolished in 1989. Its bond interest payments are funded by the Deposit Insurance Fund (DIF) premiums of the Federal Deposit Insurance Corporation (FDIC).

<u>The Resolution Funding Corporation</u> (REFCORP) is a government-sponsored enterprise established by Congress in 1989 to issue bailout bonds and raise funds for the activities of the Resolution Trust Corporation and finance the bailout of savings and loan associations in the wake of the savings and loan crisis of the 1980s in the United States.

<u>The Tennessee Valley Authority</u> (TVA) is a federally owned corporation in the United States created by congress in 1933 to provide navigation, flood control, electricity generation, fertilizer manufacturing, and economic development in the Tennessee Valley, a region particularly affected by the Great Depression.

### **Investment Reports**
