

W. 5.E.1.

Memorandum Date: March 14, 2011  
Order Date: March 30, 2011

**AGENDA COVER MEMO**

---

**TO:** Lane County Board of County Commissioners  
**DEPARTMENT:** Public Works – Engineering Administration  
**PRESENTED BY:** Bill Morgan, County Engineer  
**AGENDA ITEM TITLE:** Order/In the matter of awarding a contract to EUGENE SAND CONSTRUCTION INC., for Un-Coated Oil & Sanding Rock Materials, Various Stockpile Sites, prospective Contract No. 10/11-09.

---

**I. MOTION**

That the attached board order is adopted awarding the contract for Un-Coated Oil & Sanding Rock Materials, Various Stockpile Sites, prospective Contract No. 10/11-09, to EUGENE SAND CONSTRUCTION INC., in the amount of \$251,838.50; directing that the contract be executed in accordance with the bid specifications; authorizing the County Administrator to sign the contract; and requiring the contractor to present a performance bond and payment bond in the full amount of the contract.

**II. DISCUSSION**

**A. Background / Analysis**

Through approval of the fiscal year 2010-2011 Lane County budget, the Board has authorized funding to obtain rock for use in road maintenance activities.

This contract provides for the furnishing, hauling, and stockpiling of 1/4" - #10 Un-Coated Oil Rock in stockpile, 680 Tons; 1/4" - #10 Sanding Rock in stockpile; 1,000 Tons; 3/8" - #10 Un-Coated Oil Rock in stockpile, 14,820 Tons, and all other work and materials as called for in the plans and specifications for stockpiling at various sites throughout Lane County.

The un-coated oil rock will be used in the County's chip sealing program, and the sanding rock is utilized to sand roads during the winter months when the roads ice over. Locating the oil and sanding rock in several locations reduces the expense of transporting material long distances to work sites. Stockpile sites also ensure that the appropriate materials are available when needed.

The un-coated oil and sanding rock could be purchased on an as-needed basis; however, using a private contractor to haul oil rock to stockpile sites early in the year makes for a more efficient operation. This has been a standard practice for

many years. During the summer, trucking is at a premium and private haulers may not be available. In addition, using County forces to haul rock long distances to project sites slows work progress. During the winter months it is imperative to have the sanding rock stockpile in order to respond to conditions during periods of inclement weather. The proposed stockpiling acquisition method is more cost effective and helps to ensure the availability of material when needed.

**B. Recommendation**

Award contract to the low qualified bidder.
