“Large flat area, previously a part of the floodplain. Now bermed along river, but does not act as retention area during certain river stages.” (DMDP 1978)

“Part of site is presently being used for storage of logs before they are take to the mill. The filling of the site would bring the area out of seasonal inundation, and thus may improve equipment maneuverability and local water runoff. This is considered a key disposal site.” (DMDP 1978)

Site size: 14 acres.

Site capacity: 225,000 cubic yards at 10 feet depth.
