

Memorandum Date: October 6, 2006 Order Date:

October 18, 2006

TO:

**Board of County Commissioners** 

**DEPARTMENT:** 

Public Works Dept./Land Management Division

PRESENTED BY:

BILL VANVACTOR, COUNTY ADMINISTRATOR

KENT HOWE, PLANNING DIRECTOR

**AGENDA ITEM TITLE:** 

MATTER OF CONSIDERING A BALLOT lN THE MEASURE 37 CLAIM AND DECIDING WHETHER TO MODIFY, REMOVE OR NOT APPLY RESTRICTIVE LAND USE REGULATIONS IN LIEU OF PROVIDING JUST

COMPENSATION (PA05-5735, ROBERTS)

#### I. **MOTION**

Move to approve the Measure 37 Claim and adopt the order attached to this memo.

#### II. **AGENDA ITEM SUMMARY**

Shall the Board of County Commissioners compensate an applicant under Ballot Measure 37 and LC 2.700 through 2.770 for the reduction in fair market value of the affected property interest resulting from enactment or enforcement of restrictive land use regulations or modify, remove, or discontinue application of those land use regulations to the subject property to allow Edgar Roberts to use the property as allowed at the time he acquired an interest in the property?

#### 111. BACKGROUND/IMPLICATIONS OF ACTION

#### A. **Board Action and Other History**

This claim was originally hearing on November 8, 2005. On that date, the Board requested additional information regarding the current ownership and the alleged reduction in value.

This item was heard again on August 2, 2006. At that hearing, the Board accepted the new evidence regarding the ownership, but the claimant had not submitted any new evidence regarding the alleged reduction in fair market value. The Board decided to close the hearing, leave the record open and roll this item to the meeting on August 23, 2006, to allow the claimant time to submit new evidence.

On August 23, the Board rolled this item to September 13, because the claimant indicated he needed additional time to submit the requested information. On September 13, the Board rolled this item to October 18.

On October 6, the applicant submitted an appraisal. According to this appraisal, the alleged reduction in fair market value is \$470,000.

**Applicant:** Edgar Roberts

**Current Owner:** Roberts Family Trust **Agent:** Baker and Assoc. Surveyors

Map and Tax lot: 21-35-18 #900

Acreage: 22 acres

**Current Zoning:** F2 (Impacted Forest)

Date Property Acquired: Edgar Roberts acquired the property in 1955.

The Roberts Trust acquired the property on Jan. 28, 2005.

Date claim submitted: This claim was submitted on June 1, 2005. At the hearing on November 8, 2005, the Board requested information regarding the reduction in value and information regarding the Trust. On that same date, the applicant waived the processing deadline. At the hearing on August 2, 2006, the Board requested additional information regarding the alleged reduction in value.

Land Use Regulations in Effect at Date of Acquisition: Unzoned.

**Restrictive County land use regulation**: Minimum lot size and restrictions on new dwellings in the F2 zone.

# B. Policy Issues

The applicant submitted an appraisal on October 6, 2006.

# C. Board Goals

The public hearing will provide an opportunity for citizen participation in decision making, in conformance with the overall goals of the Lane County Strategic Plan.

# D. Financial and/or Resource Considerations

Based on the appraisal, the applicant is alleging a reduction in value of \$470,000.

# E. Analysis

# **Summary**

The claimant has submitted information in support of this claim including an

appraisal, deeds and the processing fee.

The property contains two dwellings, 22 acres and is zoned F2. In this zone, the minimum lot size is 80 acres and new dwellings require a special use permit. The claimant wishes to subdivide the property into lots that contain less than 80 acres and place a dwelling on each lot. Edgar Roberts acquired an interest in the property in October 1955. The exact date and the recording number are not legible on the submitted deed. Nevertheless, the property was unzoned in 1955.

The property was conveyed to the Roberts Family Trust on January 28, 2005 (WD 2005-20017). This is a revocable trust and Edgar Roberts is a trustee.

To have a valid claim against Lane County under Measure 37 and LC 2.700 through 2.770, the applicant must prove:

- 1. Lane County has enacted or enforced a restrictive land use regulation since the owner acquired the property, and
- 2. The restrictive land use regulation has the effect of reducing the fair market value of the property, and
- 3. The restrictive land use regulation is not an exempt regulation as defined in LC 2.710.

# **Restrictive Regulations**

Edgar Roberts acquired an interest in the property when it was unzoned. He conveyed the property to the Roberts Family Trust on January 28, 2005 (WD 2005-20017). Because trust is revocable and Edgar Roberts is a trustee, the trust is not considered a new owner. If the Board determines this is a valid claim, a waiver of the restrictive regulations of the F2 zone can be granted to Edgar Roberts.

#### Reduction in Fair Market Value

The claimant has submitted an appraisal that states the fair market value has been reduced by \$470,000. The Board must determine if this evidence demonstrates a reduction in fair market value from the enforcement of a land use regulation.

# **Exempt Regulations**

The F2 (Nonimpacted Forest) limitations on new dwellings, and the minimum parcel size of 80 acres do not appear to be exempt regulations described in Measure 37 or LC 2.710.

#### Conclusion

It appears this is a valid claim if the Board determines the submitted evidence demonstrates a reduction in fair market value resulting from enforcement of a restrictive land use regulation.

### F. Alternatives/Options

The Board has these options:

- Determine the application appears valid and adopt the order attached to this report.
- Require more information regarding the reduction in value or ownership.
- Conclude the application is not a valid claim and direct the issuance of a final written decision by the County Administrator denying the Claim.

# V. <u>TIMING/IMPLEMENTATION</u>

If the Board determines this is a valid claim and waives a land use regulation, the claimant must receive a similar waiver from the state before a land use application and/or development proposal is submitted.

### VI. RECOMMENDATION

If the Board determines the submitted evidence demonstrates a reduction in fair market value from enforcement of a restrictive land use regulation, the County Administrator recommends the Board waive the minimum parcel size and new dwelling restrictions of the F2 zone.

# VII. FOLLOW-UP

If an order is adopted, it will be recorded.

# VII. ATTACHMENTS

This cover memo prepared for the Board hearing does not contain the entire submittal. The entire submittal is contained in a notebook labeled "PA05-5735/Roberts", available in the County Commissioners Office. The portions of the submittal included with this memo are identified below:

- Draft order to approve the claim of Edgar Roberts.
- Vicinity Map.
- Appraisal submitted on October 6, 2006.

# BEFORE THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDER No.

) IN THE MATTER OF CONSIDERING A
) BALLOT MEASURE 37 CLAIM AND
) DECIDING WHETHER TO MODIFY, REMOVE
) OR NOT APPLY RESTRICTIVE LAND USE
) REGULATIONS IN LIEU OF PROVIDING JUST
) COMPENSATION (PA05-5735/Roberts)

WHEREAS, the voters of the State of Oregon passed Ballot Measure 37 on November 2, 2004, which added provisions to Oregon Revised Statutes (ORS) Chapter 197 to require, under certain circumstances, payment to landowners if a government land use regulation restricts the use of private real property and has the effect of reducing the property value; and

WHEREAS, the Board of County Commissioners of Lane County enacted Ordinance No. 18-04 on December 1, 2004, to establish a real property compensation claim application process in LC 2.700 through 2.770 for Ballot Measure 37 claims; and

WHEREAS, the County Administrator has reviewed an application for a Measure 37 claim submitted by Edgar Roberts (PA05-5735), the owners of real property described in the records of the Lane County Assessor as map 21-35-18, tax lot 900, consisting of approximately 22 acres in Lane County, Oregon; and

WHEREAS, the County Administrator has determined that the application appears to meet all of the criteria of LC 2.740(1)(a)-(d), appears to be eligible for just compensation and appears to require modification, removal or not applying the restrictive land use regulations in lieu of payment of just compensation and has referred the application to the Board for public hearing and confirmation that the application qualifies for further action under Measure 37 and LC 2.700 through 2.770; and

WHEREAS, the County Administrator has determined under LC 2.740(4) that modification, removal or not applying the restrictive land use regulation is necessary to avoid owner entitlement to just compensation under Ballot Measure 37 and made that recommendation to the Board; and

WHEREAS, the Board has reviewed the evidence and confirmed the application appears to qualify for compensation under Measure 37 but Lane County has not appropriated funds for compensation for Measure 37 claims and has no funds available for this purpose; and

WHEREAS, on November 8, 2005, and August 2, 2006, the Board conducted public hearings on the Measure 37 claim (PA05-5735) of Edgar Roberts and has now determined that the restrictive F2 (Impacted Forest) zone dwelling and land division requirements of LC 16.211 were enforced and made applicable to prevent Edgar Roberts from developing the property as might have been allowed at the time he acquired an interest on October 1955, and that the public benefit from application of the current F2 dwelling and division land use regulations to the applicants' property is outweighed by the public burden of paying just compensation; and

WHEREAS, Edgar Roberts requests either \$400,000 as compensation for the reduction in value of his property, or waiver of all land use regulations that would restrict the division of land into lots containing less than eighty acres and placement of a dwelling on each lot, uses that could have otherwise been allowed at the time he acquired an interest in the property; and

WHEREAS, the Board finds that under LC 2.760(3) the public interest would be better served by modifying, removing or not applying the challenged land use regulations of the F2 zone to the subject property in the manner and for the reasons stated in the report and recommendation of the County Administrator incorporated here by this reference except as explicitly revised here to reflect Board deliberation and action to allow Edgar Roberts to make application for development of the subject property in a manner similar to what he could have been able to do under the regulations in effect when he acquired an interest in the property; and

WHEREAS, this matter having been fully considered by the Lane County Board of Commissioners.

NOW, THEREFORE IT IS HEREBY ORDERED that the applicant Edgar Roberts made a valid claim under Ballot Measure 37 by describing the use being sought, identifying the county land use regulations prohibiting that use, submitting evidence that those land use regulations have the effect of reducing the value of the property, showing evidence that he acquired an interest in the property before the restrictive county land use regulations were enacted or enforced and the Board hereby elects not to pay just compensation but in lieu of payment, the request of Edgar Roberts shall be granted and the restrictive provisions of LC 16.211 that limit the development of dwellings and the division of land in the F2 (Impacted Forest) Zone shall not apply to Edgar Roberts, so he can make application for approval to develop the property specifically described in the records of the Lane County Assessor as map 21-35-18, tax lot 900, in a manner consistent with the land use regulations in effect when he acquired an interest in the property in October 1955.

IT IS HEREBY FURTHER ORDERED that Edgar Roberts still need to make application and receive approval of any division of the property or placement of a dwelling under the other land use regulations applicable to dividing the property or placing a dwelling that were not specifically identified or established by Edgar Roberts as restricting the division of the property or placement of a dwelling, and it would be premature to not apply those regulations given the available evidence. To the extent necessary to effectuate the Board action to not apply the dwelling or division restrictions of the applicable zone described above, the claimant shall submit appropriate applications for review and approval of land divisions and any new dwellings to show the specific development proposals and in the event additional county land use regulations result in a restriction of those uses that have the effect of reducing the fair market value of the property, the County Administrator shall have the authority to determine those restrictive county land use regulations that will not apply to that development proposal to preclude entitlement to just compensation under Measure 37, and return to the Board for further action if necessary. All other Lane Code land use and development regulations shall remain applicable to the subject property until such time as he are shown to be restrictive and that those restrictions reduce the fair market value of the subject property.

IT IS HEREBY FURTHER ORDERED that this action making certain Lane Code provisions inapplicable to use of the property by Edgar Roberts does not constitute a waiver or modification

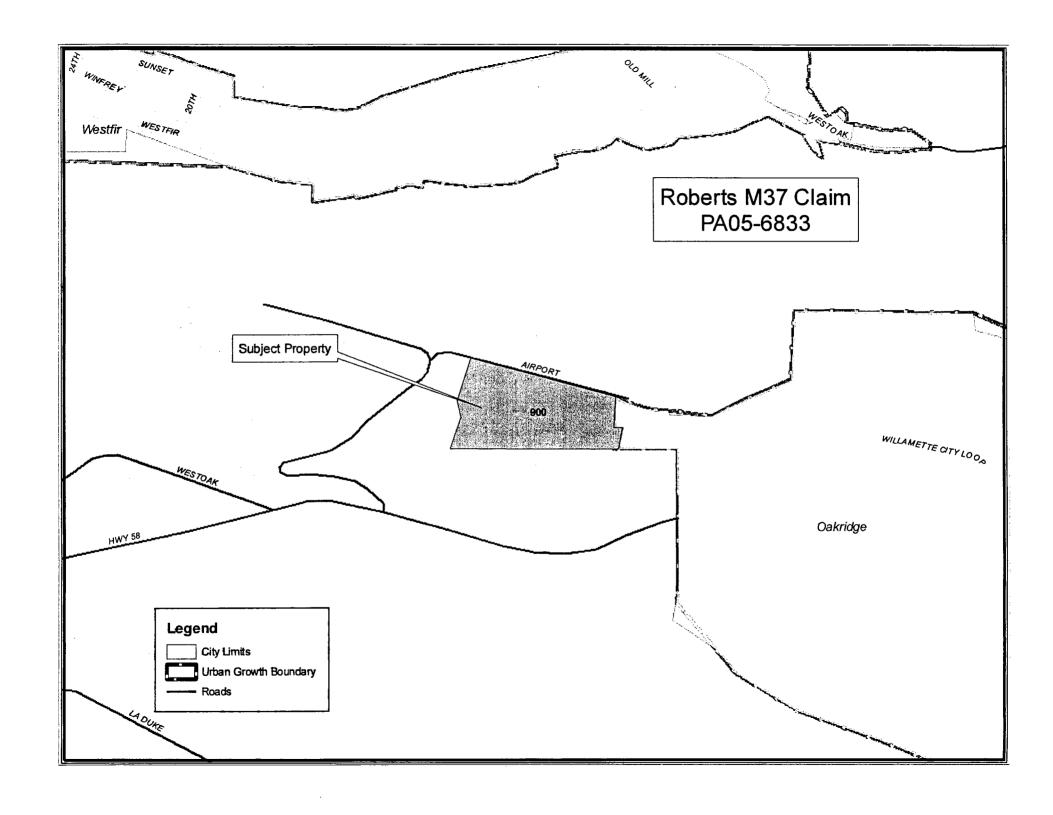

of state land use regulations and does not authorize immediate division of the subject property or immediate construction of a dwelling. The requirements of state law may contain specific standards regulating development of the subject property and the applicants should contact the Department of Administrative Services (DAS - State Services Division, Risk Management - Measure 37 Unit, 1225 Ferry Street SE, U160, Salem, OR 97301-4292; Telephone: (503) 373-7475; website address: http://www.oregon.gov/DAS/Risk/M37.shtml ) and have the State of Oregon evaluate a Measure 37 claim and provide evidence of final state action before seeking county land use approval.

IT IS HEREBY FURTHER ORDERED that the other county land use regulations and rules that still apply to the property require that land use, sanitation and building permits be approved by Lane County before any development can proceed. Notice of this decision shall be recorded in the county deed records. This order shall be effective and in effect as described in LC 2.770 and Ballot Measure 37 to the extent permitted by law. This order does not resolve several questions about the effect and application of Measure 37, including the question of whether the right of applicants to divide or build dwellings can be transferred to another owner. If the ruling of the Marion County Circuit Court in *MacPherson v. Dept. of Administrative Services*, (Marion County Circ. Ct. Case No. 00C15769, October 14, 2005) or any other court decision involving Ballot Measure 37 becomes final and that decision or any subsequent court decision has application to Lane County in a manner that affects the authority of this Board to grant relief under Ballot Measure 37 and LC 2.700 through 2.770 then the validity and effectiveness of this Order shall be governed by LC 2.770 and the ruling of the court.

<b>DATED</b> this	day of	, 2006.	
		Bill Dwyer, Chair	
		Lane County Board of County Commi	ssioners

ROBERTS, Edgar/Delores File # 47312 Airport Road

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended user, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraisar may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concessions but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations of the subject property will be performed in a professional manner.

#### APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms, i identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the producity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

# **Uniform Residential Appraisal Report**

ROBERTS, Edgar/Delores
File # 47312 Airport Road

- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facelimite transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil flability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

#### SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

URAR : Condition of improvements

1 story ranch home from 1978. Average quality. 3 bedrooms, 1 bath design. Kitchen with painted veneered cebinets and formics counters. Adjacent dinette area. Bedroom sizes are adequate and typical with typical closet space. Utility generally romics counters. Adjacent cinetic area. Section sizes are adequate and typical with typical closet space. Utility generally average. Home appears to have had consistent upkeep. Short lived items are not new but all remain servicable. Some recent upkets include new exterior doors, new overhead garage door, new exterior paint being applied at time of inspection. Roof cover appears recent. Recent repair in bathroom floor. Oversize 2 car garage contains FWA furnace and water heater. Large open patio in rear. Storage shad. Adequate landscape front and rear. Subject offered at \$157,900. Earnest money received in 37 days per MLS figures.

URAR: Improvements - Physical Deficiencies or Adverse Conditions

The appraiser has not had access to title, structural, mechanical, environmental or termite and dry rot reports. The appraiser is not aware of any reports that have been completed. The appraiser is not an expert in any of these areas and cannot warrant the subject to be free of defect in any of these areas. During the course of the normal appraisal inspection significant defect was not noted by the appraiser in any of these areas. In all cases were composition siding is present the appraiser can offer no warrants as to its type or condition. Inspection is recommended at the discretion of the end user of this report. Information provided by others in the form of maps, deeds, zoning information, assessors summaries and the like are assumed accurate but not warranted by the appraiser.

.URAR: Sales Comparison Comments
Closed & pending sales reviewed. There is not much sales data in this price range that can be used as comparables for the subject. Sales as far back as 1/1/2005 were reviewed. Time adjustments computed at 1% per month. Site value adjustments made based upon site sales and land value analysis presented earlier. Other adjustments include size at \$25/sf, 1/2 baths at \$1,000 and shop building valued at 50% of replacement cost new. Effective age, quality and condition adjustments based upon drive by inspection, agent confirmations and interior photos from MLS service

Estimated value as currently developed is \$431,100 assuming current use to be the highest and best use as it existed at time of inspection. This is an "AS is" as opposed to a prospective value based upon implementation of the proposed level of development subject to a zoning change. That would be considered a "PROSPECTIVE VALUE" and assumes a zoning change to allow creation of 5 building sites as opposed to 1.

Prospective value assuming division of site is allowed and assuming current residential improvements are located on one of the 2.5+-acre sites. The subjects shop building and access drive will be located on the adjacent 2.5+- acre site.

Assuming the proposed partitioning of the site is allowed value of subject improvements on a 2.5+-acres site would be \$313,850.

Adjacent alte of 2.5+- acres with shop building and access would be valued at \$122,250.

Additional site value as presented earlier for 3 additional 5.5+- acre sites would be \$465,000.

Total value under the proposed program of utilization would be \$901,250.

Variance in value associated with proposed zoning and density change appears to be \$470,000.

#### URAR : Site Comments

Mixed sloped parcel on the downhill (south) side of Airport Road. Much of the parcel is near level or gently sloped with evenly spaced young reprod tree cover. Some steeply stoped land is present but utility is generally good. Site appears adequately drained. Site served with a private well. Owner indicated pump at 190 feet with 10-12 gpm flow. Septic said to function properly. Appraiser is unaware of any adverse easements or encoachments affecting utility of the parcel. Owner related none at time of inspection. Scanned zoning map confirms zoning as F2 with the subject parcel. Current zoning implemented in 1984. Between 1979 and 1984 zoning was RR2. Prior to 1979 subject site was unzoned.

On attached zoning map subject parcel appears to be mis-identified as tex lot 901. Tax lot is 900 per current tax lot map scanned into addenda. Tax lot 900 is assumed correct.

Site adjoins Oakridge city limits. Other zonings in the areas include RR5, RR10, F1, M3 and AO. City indicated subject site is not in Oakridge Urban Growth or Urban Services Boundary.

Highest and best use is the discussion which generated this appraisal request. A measure 37 claim has been filed. Highest and best use under F2 zoning regulations is a single 21.9 buildable homesite as currently developed.

Under requested changes a total of 5 sites are proposed, 2 at 2.5~ acres and 3 at 5.5 acres. Land (vacant and improved) will be valued under each program of utilization.

The proposed level of development appears reasonable and consistent with the mix of eites on this tax lot map many of which were developed in 1978.

#### URAR: Site Sales Reviewed and Land Value Conclusions

. URAR: Site Sales Reviewed and Land value Conclusions

Site sales from 08/01/2004 to the current date of appraisal were reviewed. Data from the Cakridge/Westfir area is rather minimal and data from the area around Lowell and Dexter was used to suppliment local data, its unavoidable. The data has to come from somewhere. Relatively little current data is available so the period from which comparables are chosen is extended backwards to gather gather sufficient data to estimate value.

213510	533	4.74 ac \$99,500	Well in place, Septic approved

			· ·· · · · · · · · · · · · · · · · · ·

This Oakridge/Westfir area is a relatively small distinct marketplace. Site sales from the prior 2 years were reviewed. There is not a lot of data available. Pending and offered data also reviewed. Sales from closest adjacent area of Lowell/Dexter/Pleasant Hilli area also reviewed.

Subject location within the community is somewhat unique. Etavated area with expansive views of surrounding wooded hill and subject location when the community is somewhat unique. Ensurance area with expensive mass or surfuring wooded this aritory. Low traffic alrifield services primarily single engine small planes does not produce adverse noise influence but does assure that intensive development will not occur there by increasing the appeal of the location. A range will be given which basically compared indicated value based upon local against out of area comparables. Local pricing provided low indicators, out of area compasset upper limits. Given the amenities of the proposed sites a value estimate bracketed by the high and low indicators to be reasonable. Sales were adjusted to produce the indicated range. Most common adjustments made include various utilities, time and location/appeal,

```
$75,000 to $135,000, say $105,000 (2 such sites proposed) $115,000 to $195,000, say $155,000 (3 such sites proposed)
2.5+- acre sites
5.5+- scre sites
```

Summary of land value as of date of inspection is \$875,000 assuming county approval of proposed division by Lane County and associated costs of such division. Absorption within 12 months is reasonable given current Oakridge/Westir market conditions. Estimated values include standard asptic approvals only. Costs associated with installation of items such as wells, septic systems, access and power prior to sale should be added to land value estimates. Terms of sale are cash or equal.

Land value under the current program of utilizzation (one non-divisible 21.9 acre homesite) is estimated at between \$182,500 and \$225,000, say \$205,000.

The difference in land value between the two programs of utilization is \$470,000.

• <u>URAR: Neighborhood Market Factors</u>
The subject is located in the Oakridge/Westifr area approximately 45 miles coutheast of Eugene via Hwy 58. Populations are roughly 3,000 and 250, respectively. These are rural communities largely surrounded by national and private forest lands. The closest neighboring community is Lowell, Oregon which is smaller than Oskridge and perhaps 25 miles weat along Highway 58.

Basically, nothing but hills, trees and the Willamette River between Oskridge and Lowell. This is a distinct market area due to its demographics. Comparables from other communities tend not be be acceptable when considering residential sites or developed properties.

Until 25% years ago Oakridge was supported by an active timber industry. The reduction of allowable timber cutting on federal lands destroyed the local lumber based economy. There have been no new industries attracted to the area to replace lost timber jobs. Currently, the major employers in the area include the local municipality, including school district, and the forest service. Commuting into the Eugene/Springfield area for employment is common.

Its taken considerable time but the economic base is shifting to tourism and retirement. The area has good access to recreational opportunities in the Willamette National Forest. Access to Willamette Ski Pass is good. HWY 58 is one of the few passes through the Cascade Mountains separating eastern and western Oregon. HWY 58 carries considerable traffic. The communities location amid hunting, fishing, skiling and other outdoor sports activities is beginning to attract out of area buvers.

The local housing market exhibits constatent sales activity in all classes of property and price ranges represented. Financing concessions in the form of seller contributions to closing costs are intermittently present in all price ranges. Some REO property sales are noted. Lately, there appears to be more buyers from the larger markets of Eugene and Springfield purchasing Oakridge properties. Also many buyers are coming in from out of state. Values in the Oakridge area are lower than in Eugene and Springfield and much lower than many California markets. These properties are becoming good investments to some buyers. As values rise considerable numbers of homes are being purchased for renovation and resale. Overall, the communities housing stocks appears to be improving and increasing in value.

In response to this increasing effective demand and partition submitted by developers the Cakridge planning department, at its May 1006 meeting, approved zone changes and annexations for 260+- building sites within the urban growth limits of Cakridge. These developments represent the first algorificant additions to the community in years and are a direct response to the increased effective demand noted above.

The commute to the larger markets of Eugene and Springfield is being made more difficult by higher gas prices. Still this appears to be an active market in this area. Values appear to be increasing over time and for a community of this size there is considerable sales activity in the prior 12 months. Pending sales prices tend to be much higher than the corresponding period 12 months ago. Specific appreciation rates have not been extracted but a rate of at least 12% per year would not be unreasonable. Mis does not break out stats for the Oakridge/Westfir area. Just lately there has been somewhat of a slowdown in the market throughout all of Lane County. Sales activity is down, particularly in the higher price ranges, Properties tend to be sitting on the market longer and price reductions are not uncommon. Oakridge resitors report a recent increase in listing and slowdown of sales as well. Part of this is seasonal with the beginning of the school year but its sico a reaction to national housing trends.

The subject is located just outside of city limits on the hill west of town. Flanks of the hillside tend to be wooded and mixed moderate to steep slope. A power line essement bisects the hillside and adjoins the subjects southern boundary line. Owner of subject site indicated power line does not encumber the subject property. A residential utility easement runs along the northern edge of the subject site along Airport Road. The land on the crest of the hill surrounding the subject is the site of the Oakridge Airport and a number of residential homesites of varied size. A review of the subject and surrounding tax lot maps indicates a mix of parcel sizes ranging from 1+ acres ranging up to large timber productions tracts. This mix of parcel sizes is typical of many unknoopporated areas adjacent to incorporated communities. Area was unzoned till 1979 when RR2 zoning was imposed. Zoning was then changed to F2 in 1984. Most of the partitioning noted on the subjects tax lot map occurred in 1978 through

#### URAR: Neighborhood Market Conditions

• UKAR: Neighborhood Market Congrigons
15 & 30 year conventional mortgages at 6 to 7% are most prevalent. FHAVA financing is also represented. Concessions in the form of paid closing costs are intermittently present in all price ranges. All price ranges appear active but it must be remembered this is a small community with relatively few seles in some price ranges and some classes of property. New construction is not a factor in the market but renovation is. As noted earlier new site development and new construction is just beginning. Some foreclosure activity is present with many homes being purchased for rehabilitation and resale. Renovated homes appear well received by the marketplace. There is not an oversupply of available homes in the town. Sales activity has been steady and properties in all price ranges are readily absorbed with increasing prices over time. Interest rates are very foundable to home authorises or refinences and concerns to be unprovided the extract residual technique to the content of the con favorable to home purchases or refinances and appear to be supporting the current market activity levels. Lately there has been a slow down in effective sales activity. The local economy appears to be reacting to national trends. With our high percentage of move in buyers sluggish markets in other locations such as California produce a corresponding slow down in local market activity. In the larger markets of Eugene and Springfield marketing periods for upper end properties appear to be extending. Increasing numbers of listing are appearing as are price reductions in some price ranges. Local Oakridge resitors indicate some slowing of effective sales activity and an increase in listings. For now values appear generally stable.
